Estimated Fatalities

Red alert for economic losses. Extensive damage is probable and the disaster is likely widespread. Estimated economic losses are 0-3% GDP of the United States. Past events with this alert level have required a national or international level response.

Yellow alert for shaking-related fatalities. Some casualties are possible.

*Estimated exposure only includes population within the map area.

Population Exposure

Structures

Overall, the population in this region resides in structures that are highly resistant to earthquake shaking, though some vulnerable structures exist. The predominant vulnerable building types are unreinforced brick masonry and reinforced masonry construction.

Historical Earthquakes

Date (UTC)	Dist. (km)	Mag.	Max MMI(#)	Shaking Deaths
1984-11-26	300	5.1	V(17k)	0
2003-12-22	209	6.6	VI(8k)	2
1989-10-18	38	6.9	VIII(109k)	62

Recent earthquakes in this area have caused secondary hazards such as tsunamis, landslides and liquefaction that might have contributed to losses.
